Innovative Chemistry for Lubricants

## Technical Data Sheet

## FUNCTIONAL V-158 <br> VISCOSITY INDEX IMPROVER

## APPLICATION:

FUNCTIONAL V-158 is a viscosity index (V.I.) improver that may be used in preparing multigrade engine oils as well as industrial fluids and lubricants. It may also be used without dilution as a supplemental crankcase additive for the automotive aftermarket.

## COMPOSITION:

The active thickener in FUNCTIONAL V-158 is a copolymer of ethylene and propylene that has been used as a V.I. improver by major oil companies. The diluent in FUNCTIONAL V-158 is a light paraffinic mineral oil.

Typical Properties

| Specific Gravity | 0.85 |
| :--- | :--- |
| Lbs per Gallon | 7.1 |
| Flash Point | $175^{\circ} \mathrm{C}\left(350^{\circ} \mathrm{F}\right)$ |
| Kinematic Viscosity | 1250 cSt at $100^{\circ} \mathrm{C}$ |
| Color | Yellow (1-2 ASTM) |
| Thickening efficiency <br> (14.5\% in ISO 32 paraffinic base oil) | $12.5-15.5 \mathrm{cSt}$ at $100^{\circ} \mathrm{C}$ |
| Shear Stability <br> (10-hr L-38 test, MIL-L-46152) | $28 \%$ thickening loss |
| Shear Stability Index (PSSI) ASTM D 6278 | $45 \%$ |

## TREATMENT LEVEL:

Treatment levels from 5-20\% are typical in industrial lubricants and greases. Please refer to the application bulletins for more information.

## HANDLING:

Due to the viscosity of FUNCTIONAL V-158, elevated temperature (up to approximately $90^{\circ} \mathrm{C}$ or $200^{\circ} \mathrm{F}$ ) can facilitate handling. Safe handling precautions are the same as those to be taken with the base oil; see the current Safety Data Sheet.

Shelf life: 2 years
