## **FUNCTIONAL V-160P2**

### 22 SSI PAO-BASED VISCOSITY INDEX IMPROVER

#### **APPLICATION:**

**FUNCTIONAL V-160P2** is a readily biodegradable olefin copolymer viscosity index improver formulated in low viscosity polyalphaolefin (PAO) that may be used to prepare PAO hydraulic fluids (HEPR) with greater biodegradability or to improve the low temperature fluidity and pour point of non-PAO formulations. **FUNCTIONAL V-160P2** is also an economical replacement to high viscosity metallocene PAO for increasing viscosity without diminishing compatibility with other polymers or additives in the formula.

#### **COMPOSITION:**

**FUNCTIONAL V-160P2** is a concentrated olefin copolymer in light polyalphaolefin.

#### TREATMENT LEVEL:

Treatment levels from 5 - 20% are typical in industrial lubricants and greases.

See next page for comparison of **FUNCTIONAL V-160P2** against 100 cSt PAO.

#### **HANDLING:**

Due to the viscosity of **FUNCTIONAL V-160P2**, elevated temperature (up to approximately 90°C or 200°F) can facilitate handling. Safe handling precautions are the same as those to be taken with the base oil; see the current Safety Data Sheet.
